Exam : **C5050-384**

Title : IBM Cloud Platform
Application Development v2

Vendor : IBM

Version : DEMO

NO.1 What can a user do after deploying a boilerplate application?

- A. Use IBM Cloud provided test data in the application.
- B. Copy the application to another IBM Cloud region using the dashboard.
- C. Connect additional managed services to the application.
- D. Choose the runtime they wish to use for that application.

Answer: B

Explanation

Explanation

NO.2

A developer has an application based on the Liberty profile running in IBM Bluemix PaaS. The developer wants to maintain high availability on HTTP sessions. What is the benefit of using IBM Bluemix Session Cache service?

- A. Session data is shared across different browsers.
- B. Session data is automatically stored in remote file systems.
- C. Session data is encrypted and stored in a MySQL database.
- D. Session data is recovered after an application instance crashes.

Answer: B

NO.3 Which statement accurately describes IBM Cloud Continuous Delivery toolchains?

- A. Toolchains automate dependency management and testing.
- B. Toolchains combine the DevOps test and deploy phase of deploying software.
- C. Toolchains enable development organizations to standardize and scale their continuous delivery processes.
- D. Toolchains can be created in three ways: use a template, use a buildpack, or create the toolchain from an application.

Answer: B

Explanation

Explanation

A toolchain is a set of tool integrations that support development, deployment, and operations tasks.

NO.4 A retail company wishes to improve their customers' experience on their e-commerce web site

that they have recently deployed on Bluemix.

The company wants to understand the emotions expressed by their customers on social media, such as Twitter, to better serve them. Which IBM Bluemix Watson product can they use to help them?

- A. Natural Language Understanding
- B. Conversation
- C. Personality Insights
- D. Natural Language Classifier

Answer: A

Explanation

Explanation

With Watson Natural Language Understanding you can uncover insights from structured and unstructured data. Analyze text to extract meta-data from content such as concepts, entities, keywords, categories, relations and semantic roles. You can understand sentiment and emotion. It returns both overall sentiment and emotion for a document, and targeted sentiment and emotion towards keywords in the text for deeper analysis.

NO.5 Which two third-party services are available in the IBM Cloud catalog for performing application load testing?

(Select two.)

- A. CloudFront
- B. BlazeMeter
- C. Load Impact
- D. Visual Studio
- E. Watson Load Insights

Answer: B D

Explanation

Explanation

B: The third-party service BlazeMeter is a load and performance testing platform that offers a cross-enterprise test automation framework for the entire technical team throughout the product development lifecycle.

Developers, DevOps, Ops and QA Engineers can run Continuous or "On Demand" testing for APIs, mobile apps and websites. BlazeMeter can be used in the cloud, on-premise or as a hybrid solution. It is compatible with Apache JMeter and Selenium and integrates with CI, CD, and APM tools.

D: The third-party service Load Impact helps developers test their code at scale by harnessing the power of cloud-based testing to generate loads on their web applications from multiple geographical regions.
