Exam : P_ADM_SEC_70

Title : SAP Certified Technology
Professional - Security with SAP
NetWeaver 7.0

Vendors : SAP

Version : DEMO

NO.1 Which of the following authentication mechanisms are available for SAP NetWeaver AS Java.?

Note: There are 3 correct answers to this question.

- A. Security session IDs for Single Sign-On between applications
- B. SAP Logon Tickets for Single Sign-On
- C. SAML Assertions for Single Sign-On
- D. Web Dynpro for Single Sign-On
- E. Kerberos Authentication for Single Sign-On

Answer: A,B,C

NO.2 After the installation of SAP Web Dispatcher you want to create additional users to administer SAP

Web Dispatcher. Where are these users stored?

- A. In the table USR02 in AS ABAP.
- B. In the local database of SAP Web Dispatcher.
- C. In the filesystem.
- D. In the table WEBDISP_USER in AS Java.

Answer: C

NO.3 When is it acceptable not to take action on an identified risk?

- A. Never. Good security has to address and reduce all risks.
- B. When political issues prevent this type of risk from being addressed.
- C. When the necessary countermeasure is too complex.
- D. When the cost of the countermeasure outweighs the value of the asset and the potential loss.

Answer: D

NO.4 Which of the following statements regarding regulations is false?

Note: There are 2 correct answers to this question.

- A. SOX (Sarbanes-Oxley Act) is a binding regulation for companies traded at the US stock market.
- B. ITIL (IT Infrastructure Library) represents a universally applicable framework for optimum handling of processes in IT management.
- C. The focus of CobiT (Control Objectives for Information and Related Technology) is on auditors, not on IT management and IT end users.

Answer: A,B

NO.5 Which of the following statements regarding load balancers are true?

Note: There are 2 correct answers to this question.

- A. With a reverse proxy, you can route incoming requests to different services based on the URL path.
- B. The SAP Web Dispatcher is a full-fledged reverse proxy.
- C. The SAP Web Dispatcher uses SAP Logon Groups in Enterprise Portal scenarios.
- D. You can administer the SAP Web Dispatcher using transaction: WEBDISP.
- E. You can combine the SAP Web Dispatcher and web switches in the demilitarized zone (DMZ).

Answer: A,E

NO.6 When you use the Central User Administration (CUA), when will your changes to user data become effective in the child systems? Please also consider the options that the Application Link Enabling technology (ALE) offers.

Note: There are 2 correct answers to this question.

- A. Changes are replicated immediately.
- B. The changes can be replicated by the background job "CUA_Distribute" in the central system.
- C. The IDocs that transport the changes to the user master data in the child systems can be collected and transferred at a later time, triggered by a background job.
- D. The changes can be replicated by selecting the button "Distribute all data" in transaction SCUA.
- E. The data for CUA will be replicated to the child systems every 60 minutes if no other setting/configuration overrides this default value.

Answer: A,C

NO.7 The SAP Web dispatcher gets information about the application servers and groups required for load distribution from the message server and application servers. HTTP is used for this communication.

You want to change this communication to HTTPS.

Which of the following statements are true?

Note: There are 3 correct answers to this question.

- A. The SAP Web Dispatcher must be set up for Secure Socket Layer (SSL).

- B. The message server must be set up for Secure Socket Layer (SSL).
- C. The internal group: !DIAGS must be empty.
- D. The SAP Web Dispatcher must be able to accept the server certificates from the message server.

Answer: A,B,D

NO.8 Which of the following statements regarding the SAP Security Optimization Service are true?

Note: There are 2 correct answers to this question.

- A. It is a local service offered by the SAP Solution Manager.
- B. The service can be performed at any time.
- C. All checks are automated for the service.
- D. The service focuses on internal and external system security.

Answer: B,D

NO.9 Which of the following authentication mechanisms is not accepted by SAP NetWeaver Portal 7.0?

- A. SAML Assertions
- B. User ID / password
- C. X.509 client certificates
- D. SNC based authentication
- E. Web Access Management (WAM) products

Answer: D

NO.10 Which of the following considerations are important if a customer plans to use the Internet Connection

Manager (ICM) in SAP NetWeaver AS 7.0, together with Microsoft Internet Explorer? Note: There are 2

correct answers to this question.

- A. The use of the TCP/IP ports must be agreed with the security/network department.
- B. The location of the SAP NetWeaver AS 7.0 within the network topology must be agreed with the network department.
- C. The SAP Gateway Port 3300 must be taken into consideration for the ICM.

Answer: A,B

NO.11 Which areas in the SAP environment does the SAP Security Optimization Self Service check?

- A. SAPOuttab (SAPRouter)
- B. WGate and AGate configuration (SAP ITS)
- C. SSL check for the SAP J2EE Engine
- D. Customized settings in the NW AS ABAP environment

Answer: C

NO.12 Which of the following is a characteristic of the Segregation of Duties (SOD) principle?

Note: There are 2 correct answers to this question.

- A. The SOD principle is a preventive control.
- B. The SOD principle is a detective control.
- C. Enforcing the SOD principle means that no single individual can carry out a critical task that could prove to be corruptive to the company.
- D. Enforcing the SOD principle means that individuals are capable of performing the tasks for different roles, rather than depending on just one individual.

Answer: A,C

NO.13 Which of the following is not a fundamental part of a Regulatory Security Policy?

- A. Why is it being done?
- B. What is to be done?
- C. When it is to be done?
- D. Who is supposed to do it?

Answer: D

NO.14 Which of the following statements regarding SSO and SAP Logon Tickets are true?

Note: There are 3 correct answers to this question.

- A. Users have the same user ID and password in all of the systems they access using SAP Logon Tickets.
- B. The end users' Web browsers accept cookies (SAP GUI not in use).
- C. The clocks for the accepting systems are synchronized with the ticket-issuing system.
- D. The SSO ticket is issued after successful login to the SAP NetWeaver AS Java.
- E. The cookie is stored in the temporary folder of the local GUI.

Answer: B,C,D

NO.15 A customer uses an LDAP (Lightweight Directory Access Protocol) enabled directory server. To simplify

the administration of SAP users, Central User Administration (CUA) was introduced. Now there are plans to synchronize the LDAP enabled directory server with the CUA. Which of the following statements are true?

Note: There are 2 correct answers to this question.

A. The SAP user field: BNAME is already a standard for most of the LDAP enabled directory server.

Therefore the field mappings can be easily customized.

B. The synchronization of fields can be controlled via a mapping transaction in SAP ABAP.

C. A prerequisite for the communication between the CUA and the LDAP enabled directory server is to

open the LDAP(s) port in the firewall environment, if a firewall is used.

D. The communication between LDAP and the CUA is based on PI 7.1. Therefore, SAP specific PI

adapter ports must be open in the firewall environment.

E. A SAPROUTER must be used to establish the proper connection between the SAP CUA and the LDAP provider.

Answer: B,C
